Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-3, 5-7 are rejected under 35 U.S.C. 102(e) as being anticipated by Yun (US Pat. 6,654,251).

Regarding claims 1-3, 5-7, Yun discloses a heat dissipating structure for a computer casing having a front board, a back board, and a bottom board, wherein the front board and back board are parallel and correspond to each other by being connected together on the bottom board, comprising: two supporting frames 20, 30 mounted at an opposite side corresponding to the bottom board 27 for respectively connecting with upper sides of the front board and the back board so as to form a rectangular hexahedron; and plural placing slots 25 mounted on the front board for placing a disk drive11, a CD-ROM drive, and plural connectors therein, wherein the front board further has plural heat dissipating openings mounted thereon between positions of the placing slots 31 wherein the plural heat dissipating openings are round

Art Unit: 2835

heat dissipating openings wherein the plural heat dissipating openings are polygonal heat dissipating openings.

Allowable Subject Matter

2. Claim 4 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: the prior art fails to disclose the back board has openings and a heat dissipating fan mounted thereon, the openings are at positions corresponding to the heat dissipating fan and parallel to the heat dissipating openings of the front board so as to help the air flowing inside the computer casing.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Crippen et al (US Pat. 6,771,499) teach server blade chassis with airflow.

Wu (US 2005/0030714) teaches heat dissipating structure for computer host.
